### Number of Trees or Plants Required per Acre— How to Estimate.

**Rule**—Divide 43,560 (the number of square feet in an acre) by the number of square feet for each plant. The result is the number required for an acre.

If trees are planted on the Triangular system, 15 per cent more than for the Square system will be required.

## Ornamental Shrubs

Our Ornamental Shrubs herein listed are all two or more years of age, No. 1 Grades. They have been field transplanted; roots and tops trimmed to produce superior root systems and symmetrical formed tops.

## Roses—Oregon Grown

Oregon Grown Roses are known East and West for their superior blooming quality and hardiness. We ship only one grade, strong 2 year No. 1 field grown bushes. They will bloom the first year.

In making comparisons, attention to **Quality is even more essential than Price.** Not all nursery stock, especially Roses, offered at "attractive prices" is profitable to the purchaser. **Buy the Best, it Always Pays.**

The selection of Roses, in our General Descriptive Catalogue, consists of many of the "standard favorites" and the best of the New and Popular introductions at moderate prices.
